The UX Design Foundation Course By NASSCOM Covers Basics Of User Experience Design, Focusing On Research, Prototyping, And Usability Principal To Create Intuitive, User-Friendly Digital, Interface And Experience

## Projects

### Tic-Tac-Toe

https://github.com/Jidnya1906/Tic-Tac-Toe/

This project implements the classic game Tic Tac Toe using Core Java, showcasing essential programming concepts such as arrays, conditional statements, loops, and basic I/O. The aim is to develop a two-player command-line game that highlights logical reasoning and array manipulation skills.

### Explore Word

https://github.com/Jidnya1906/Explore-word-WordPressTheme-

This project involved creating a bespoke WordPress theme from scratch. Initially, we developed a comprehensive Figma design, followed by translating that design into a fully functional WordPress theme, ensuring seamless integration and adherence to best practices.

### Second Childhood

https://github.com/Jidnya1906/Second_childhood

This Python project is designed to facilitate information registration for residents of an old age home. It aims to enhance the quality of life for seniors by providing a structured platform that meets the specific needs of the elderly community.

### Perscripto

https://github.com/Jidnya1906/Prescripto_fullstack

This full-stack project features two primary components: an Admin Portal and a User Portal. The Admin Portal allows for the management of doctor information and user logins, while the User Portal enables users to register, log in, schedule appointments, view dates, and cancel appointments.

### Library

https://github.com/Jidnya1906/Library_fullstack

This full-stack project enables users to manage library books efficiently. Users can issue books, select return dates, and view a comprehensive list of all available titles, enhancing their library experience through a user-friendly interface.

### Portfolio

https://github.com/Jidnya1906/MyPortfolio/

A responsive personal portfolio developed using HTML5, CSS3, and JavaScript. The design was crafted in Figma and seamlessly deployed on GitHub Pages, showcasing a professional and visually engaging online presence.

### Food Delivery

https://github.com/Jidnya1906/Food_project

A robust food delivery website developed using Java, JSP, Servlets, J2EE, HTML5, CSS3, JavaScript, and MySQL. Users can register, browse menus, add items to their cart, and place orders, while administrators efficiently manage restaurants and food items.

### E-Commerce Web Application

https://github.com/Jidnya1906/JavaEcommerce

This Java Full Stack E-Commerce project enables users to effortlessly add products to a shopping cart and secure orders. Utilizing JSP, Servlets, and MySQL, it offers comprehensive features for streamlined cart and order management, ensuring a seamless user experience.

### FinanceSiteDesign

https://jidnya1906.github.io/finance_websiteDesign/

In this web design project, I utilized HTML5, CSS3, and JavaScript to develop a comprehensive webpage that presents detailed information about the finance and insurance services offered by the company.

### Memory Game

https://jidnya1906.github.io/Memory_Game/

This interactive game invites players to embark on a delightful memory challenge by matching pairs of cards. Crafted to improve memory skills, it offers an engaging and educational experience for all ages, ensuring hours of cognitive entertainment through HTML5, CSS, and JavaScript.

### Search_AND_Filter

https://jidnya1906.github.io/Search_AND_Filter/

A dynamic web application enabling users to effortlessly search and filter items in real-time. As users type in the search box, matching results are displayed instantly without page reloads. Built using HTML5, CSS3, and JavaScript for a seamless user experience.
